# **Introduction**

**T**his is the first edition of the Liberia Financial Statistics (LFS) for the year 2008. The document continues to serve as one of the important sources of statistical information in the country for students, academicians, investors, and the likes, who are interested in making research relative to the performance of the economy. The period covered by this edition spans January, 2006 to February, 2008, and contains information on major sectors of the economy such as the monetary, real, fiscal and external.

It is expected that during the course of the year, there will be improvements in the trade balance as activities in the mining and logging sectors gain momentum. The cover of this edition is a graphical representation of the trade balance of Liberia for the period January to December, 2007.

The Management of the Central Bank of Liberia looks forward to the continued excellent working relationship that exists between its Research Policy and Planning Department and the many data providers, who continue to lend support to the laudable effort of revamping the statistical database of the country. The Management highly appreciates the efforts and hopes that with the increased cooperation and collaboration, the document will take on an even better dimension in the coming years.
