Central Bank of Liberia Monetary Policy Communiqué for July 2026 in Simple Liberian English Version

The people in the Big Bank they call the Central Bank had meeting in July to talk about how business in Liberia and the World coming on, to make sure small Liberian banks geh enough money, and that prices dem not going up too much and for the Liberian dollar to be strong.

They agree to reduce the interest so more businesspeople can borrow money from the banks.

The War they fighting in the country they call Iran make the price of fertilizer and oil from Iran to go up. When their fertilizer and oil price go up then the price of food and gas that we buy from them can go up too.

But business in Liberia still good. The Big Bank say people mor na worry too much.

The only problem there, da because some people who borrow money from small banks don't want to pay back or pay back on time. Ay making it hard for other people to borrow money from the bank dem, bor when people start paying back the money they owe, den more people can borrow money too.

The money Liberia keeping in our Big Bank and outside Liberia, ay enough to buy more than three months goods from outside Liberia and make our LD strong.

The Big Bank say business in Liberia and LD still strong. Prices will not go up too much. Ay will be good for business dem and people will benefit. The only ting da the war da going on in the country they call Iran.

People in the Big Bank will meet again in October this year to find out how tings going on. After dat they will tell everybody how tings going on.
