# **Introduction**

The Liberia Financial Statistics (LFS) compiles selected macroeconomic and financial data with the fundamental objective of producing reliable and accurate data for its users as it is a major source of statistical reference for policy makers, investors, researchers, students and the general public in the country. It is updated every two months and this is the fourth edition of the year. It covers statistical data from January to August, 2010.

As in previous editions, this publication commences with the presentation of monetary data, followed by the real sector, government finance statistics and concludes with the external trade data.

The cover page shows the end of period exchange rates for the first eight months of 2010.

The Central Bank of Liberia remains very appreciative to its many data providers who have been cooperative in supplying the Bank with the necessary statistics for the successful compilation and publication of this document.
